

## XTB235-20LY

25.78 Gbps SFP28 SM BIDI 1270 Tx/  
1330 nm Rx 20 km Transceiver

### Applications

- 25GBASE-LR

### Description

The SFP28 transceivers are cost-effective, high-performance modules designed to support a data rate of 25.78Gbps and offer a transmission distance of up to 20km using single-mode fiber (SMF).

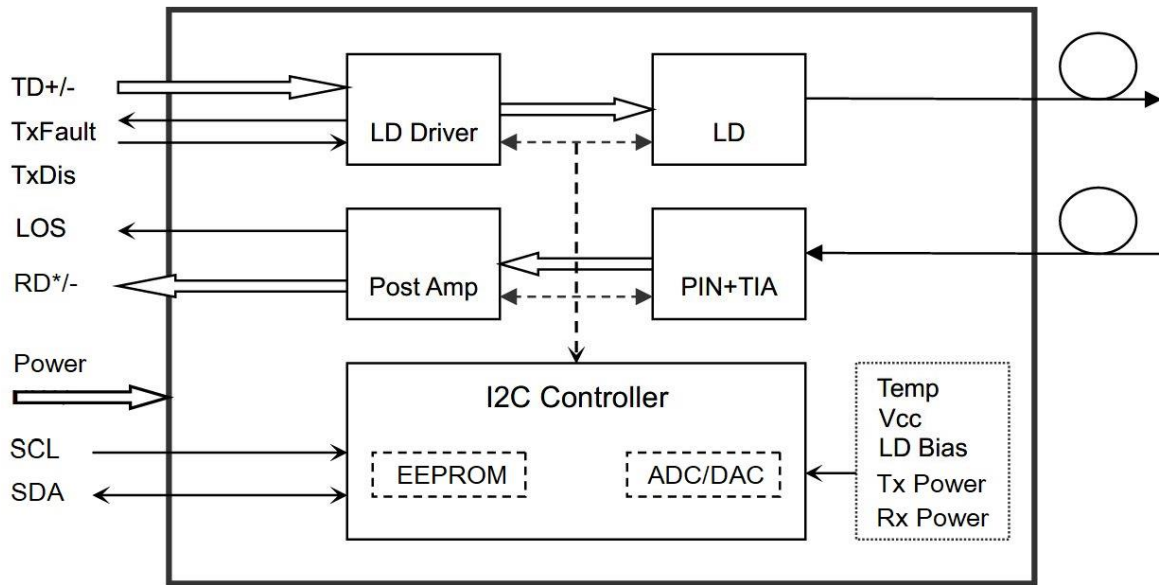

These transceivers have three main components: a DFB laser transmitter, a PIN photodiode with an integrated trans-impedance preamplifier (TIA), and an MCU control unit. Note that all of these modules meet the safety requirements of class I lasers.

Furthermore, these transceivers adhere to the SFP Multi-Source Agreement and include SFF-8472 digital diagnostics functions for compatibility and performance monitoring.

### Features

- Supports high bit rates of up to 25.78 Gbps
- Utilizes a hot-pluggable SFP+ footprint
- Employs a 1270 nm DFB laser and PIN photodiode for up to 20 km transmission over single-mode fiber (SMF)
- Complies with SFP+ MSA and SFF-8472 standards, featuring a duplex LC receptacle
- Single +3.3 V power supply
- Real Time Digital Diagnostic Monitoring
- RoHS compatible
- Operating temperature range 0 °C to +70 °C (Standard)

### Notes

1. The optical power is launched into SMF
2. PECL input, internally AC-coupled and terminated
3. Measured with a PRBS 2<sup>31</sup>-1 test pattern @25.78Gbps, BER  $\leq 5 \times 10^{-5}$
4. Internally AC-coupled

**Notes**

<sup>1</sup> For accurate order specification please contact XenOpt reseller before placing an order. The content of this document is subject to change without notice. XenOpt does not guarantee errorless or outdated information.

Please specify any compatibility requirements at time of ordering. Standard MSA compatible pluggable components may not work or some function of these components may not be available in devices that require customized compatible devices. Pluggable components compatible with one type of communications equipment may not work in other type of communications equipment.
